A-Log, Inc. is dedicated to providing you with information to help you run your business in accordance with the law. We have discovered a new IRS requirement for carriers with 25 trucks or more.

The IRS States:

Electronic filing is required for each return reporting 25 or more vehicles that the taxpayer files during the tax period. However, all taxpayers are encouraged to file electronically. File Form 2290 electronically through any electronic return originator (ERO), transmitter, and/or intermediate service provider (ISP) participating in the IRS *e-file* program for excise taxes.
